

Indiana State University's Cunningham Memorial Library has an open Tenure Track Faculty position, OER and Emerging Technology Librarian. Join an exciting campus community. Enrollments are up, we recently completed a successful comprehensive fundraising campaign, and we have been recognized among top universities by Forbes, the Princeton Review the Washington Monthly and U.S. News and World Report - designated a "Best in the Midwest" for fourteen consecutive years by Princeton Review. ISU has a strategic goal to employ and retain highly qualified staff and faculty from underrepresented groups. Our city, a regional hub for commerce, arts, sports, cultural events, and medical services, received the "Indiana Community of the Year" award.

The Library is at the heart of this exciting campus of more than 13,000 undergraduates and graduates. Our motto is "Your campus living room," and that is what we strive to be—the gathering place for campus. We offer many resources for our users including about 1.5 million items in our collection including 300,000 e-books and 93,000 e-journals/databases. Our Special Collections hosts the Wabash Valley Visions and Voices Digital Memory Project, curates Sycamore Scholars, a digital archive of scholarly works created by students, staff, and faculty at Indiana State University, and houses the Warren N. and Suzanne B. Cordell Collection of Dictionaries, one of the largest such collections in the world. In addition, we offer many services including the Math and Writing Center, the Faculty Center for Teaching Excellence, and the Commuter Lounge as well as excellent reference and instruction services, Interlibrary Loan, and e-Reserves. Offering opportunities to attend unique and rewarding programs, last year the library hosted 125 events that attracted 26,000 attendees. The Library is committed to serving as the academic and research heart of Indiana State University.

OER and Emerging Technology Librarian: 12-month tenure-track position that designs and works with open educational resources (OER), web applications, social media, and mobile interfaces. The OER and Emerging Technologies Librarian identifies, implements, and evaluates current and emerging technologies for the delivery of library services, with a special focus on social networking applications, mobile services, and instructional technologies; plans, develops and evaluates the Cunningham Memorial Library website; and works with the Reference faculty to ensure that Library's instructional resources are easy to use. This librarian will provide leadership and responsibilities in the identification, assessment, and implementation of emerging technologies that further the library's mission and increase and enhance access to library resources and services; work with users to improve access to Library technology services through outreach and instruction and make recommendations to improve online access; track changes in technology, resource platforms, and related tools that impact library users as well as use social media and other online communication tools to ensure that changes in technology are well advertised to the entire university community. The OER and Emerging Technologies Librarian is responsible for college-wide administrative support of Indiana State University's OER initiatives, with emphasis on professional development, identification of OER course content and overall support for adoption of OER. This librarian will be charged with the creation and curation of OER content at ISU. As part of the Systems department team, the person in this position will provide assistance to students and others in the wider community to ensure full access to library technology services, as well as coordinate work with other Library units to fulfill the mission of the Library and the University. This librarian will be expected to progress successfully along the tenure and promotion track and participate fully as a member of the library faculty.

Reports directly to the Chair of the Systems Department.
